

# Line and Point

**Artist:** Annie Verhoeven

**Product Code:** ANVS-lineandpoint

**Availability:** 1

**Dimensions:** 26.00cm x 26.00cm x 191.00cm

**Price: €11.450,00**

## Description

### Line and Point

Platonic square, the hexahedron, stands for earth. It has 12 edges, 3 faces per vertex, number of faces is 6 and it has 8 vertices. In this case, the cube has unequal edges.

Three cones are held together by this cube. The cone has a flat and a curved surface, the bottom is a circle. The other plane has a point on the line through the center of the circle, perpendicular to the circle, and connects that point to the edge of the circle in the shortest possible way. The cones are made of paper wire and the surfaces are made from one piece.

The outer cone is white, the color represents innocence and creativity, in it is a purple cone that color represents the feminine and intuitive. The inner cone is black, this color represents the masculine and protective. The cube is red and represents determination and energy. In this order, these qualities are essential for an artist or scientist to be able to continue their development and come up with new ideas.

## Specifications

Unique object made of braided wire, steel, rubber and perspex. Will be delivered including a pedestal made of MDF and a acrylic transparant hood.

Sizes object including pedestal and hood: 191 x 26 x 26 cm.
