**Product Code:** JAVW002

**Availability:** 5

**Dimensions:** 0.00cm x 0.00cm x 0.00cm

**Price:** €125,00

### Description

The focus is on working with precious metal (silver). If you like to wear a necklace with a beautiful silver pendant, this workshop is a great choice. Here you are going to make the pendant from silver strip, wire or plate. Techniques that will be discussed are: designing, forging (applying structure to the material), bending, dimensioning, filing, sawing, soldering, polishing. The teachers guide you through the process and you will be amazed by the result!

Making your pendant in 3 steps:

**Step 1:** We will look for your design. Round, cut-away, convex or a wire structure.... The final choice of design is up to you. We guide you in making your choice. You are going to draw a design or you are making a test model of copper. A fun journey of discovery to arrive at a beautiful design.

**Step 2:** We get started with the design in silver. Hereby the techniques sawing, filing, bending, sanding, soldering and polishing are discussed. But your hands are your biggest and most precious tool!

**Step 3:** The finishing / refining phase. Here too you can count on support / help where necessary. Together with you we go through the entire process up to the end result. Shiny polished or matte satin ... you determine the final "look" of your silver pendant. You go home with a unique piece of jewelry!

\* If desired, you can purchase a matching silver necklace from us. Ask for it.

Silver and tool use is included in the price, your ring will go with you ready to wear at the end of the class!
